Review Frequency

Seasonality

Paris and Rome dominate review share from **April to August**, reflecting peak European summer travel.

New York saw an increase in **November and December** during the holiday season.

Nearly 99% of users posted 3 reviews or fewer, showing a **highly skewed participation pattern**.

A very small number of users generated exceptionally high review activity, suggesting either **power users** or **potential outlier behavior** in the dataset.

Trust

Over two-thirds of Airbnb hosts are **fully verified**, while nearly all hosts provide at least one trust signal, keeping unverified and anonymous profiles to a minimum.
